## □ Resultados de la búsqueda

The screenshot displays the AntConc 3.4.3w (Windows) 2014 interface. The main window shows a list of concordance hits for the search term 'social'. The search was performed on a corpus of 45 files, with 45 files processed. The search results are displayed in a table with columns for Hit, KWIC, and File.

Goodbye, Ello? Searches for new **social** network collapse

Interest in invitation-only alternative **social** network craters after peaking in September

Ello saw great interest - but that now seems to be dipping.

Interest in Ello, the ad-free **social** network posited as a rival to Facebook, seems to be collapsing, according to data from Google Trends.

A graph of searches in the past 30 days on "Ello" shows that after an early peak on 26 September, followed by a higher one on 30 September, the number of searches has now declined to a level almost as low as on 23 September, when the network was just starting to grow.

Search volume for Ello through Google in the 30 days up to 14 October 2014.

Photograph: Guardian

Ello describes itself as "simple, beautiful and ad-free", and aimed to attract a more disparate group of people than Facebook - from which a number of its early users fled after the giant **social** network began to impose a "real names" requirement on
