

This guide has been developed as a quick reference tool for ElectroCraft products. It is not intended to replace technical documentation or proper use of standards and codes in installation of product.

Because of the variety of uses for the products described in this publication, those responsible for the application and use of this product must satisfy themselves that all necessary steps have been taken to ensure that each application and use meets all performance and safety requirements, including all applicable laws, regulations, codes and standards.

Reproduction of the contents of this copyrighted publication, in whole or in part without written permission of ElectroCraft is prohibited.

G240 Series

Features and Benefits

- Dynamically balanced armatures insure smooth performance at any speed
- Rugged TENV construction for long life and reliability
- Non-contact sealed ball bearings for improved efficiency and smooth operation
- Replaceable brushes extend product life cycle
- 2 Pole construction to support high speed applications
- Low ripple tachometer options for speed regulation

ElectroCraft G240 Series

The 240 series offers reliable performance in a small package for your low voltage, lower torque range applications. This series utilizes mechanically aligned electromagnetics to provide consistent speed in either rotation. The 240 series is one of ElectroCrafts most widely used products worldwide.

Typical Applications

- Printers
- Tape Drives
- Semiconductor Processing
- Robotics
- X-ray Equipment
- Medical Pumps
- Light Industrial

G240 Series Performance Specifications

Motor Ratings	240	241	242	243
Continuous Stall Torque (Ncm)	20.5	26.8	35.3	38.8
Continuous Stall Torque (oz-in)	29	38	50	55
Peak Torque (Ncm)	169.5	197.7	247.2	282.5
Peak Torque (oz-in)	240	280	350	400

G243

G360 Series

Features and Benefits

- Dynamically balanced armatures insure smooth performance at any speed
- Rugged TENV construction for long life and reliability
- Non-contact sealed ball bearings for improved efficiency and smooth operation
- Replacable brushes extend product life cycle
- 2 Pole construction to support high speed applications

ElectroCraft G360 Series

The 360 series offers high performance in a small package for your low voltage, high torque applications. This series utilizes high energy rare earth magnets to achieve high torque to size ratios. When space is at a premium the 360 series is the product for you.

Typical Applications

- XY Plotters
- Printers
- Semiconductor Processing
- Robotics
- Pick and Place Machines
- Coordinate Measuring Devices
- Medical Pumps

G360 Series Performance Specifications

Motor Ratings	362	364
Continuous Stall Torque (Ncm)	8.5	14.1

G362

G364

G640 Series

Features and Benefits

- Dynamically balanced armatures insure smooth performance at any speed
- Rugged TENV and optional sealed construction for reliability in most environments
- Non-contact sealed ball bearings for improved efficiency and smooth operation
- Replaceable brushes extend product life cycle
- Low ripple tachometer options for speed regulation

ElectroCraft G640 Series

The 640 servo series offers smooth performance for your mid to low voltage, mid-level torque applications. This series features four pole construction for reduced torque ripple and optional sealed design for more aggressive application environments.

Typical Applications

- Material Handling
- CNC Tool Changers
- Semiconductor Processing
- Robotics
- Medical Beds
- Magnetic Resonance Instruments
- Light Industrial

G640 Series Performance Specifications

Motor Ratings	642	643	644
Continuous Stall Torque (Ncm)	70.6	116.5	148.3
Continuous Stall Torque (oz-in)	100	165	210

G643

G644

G680 Series

Features and Benefits

- Dynamically balanced armatures insure smooth performance at any speed
- Rugged TENV Construction for reliability and long life
- Non-contact sealed ball bearings for improved efficiency and smooth operation
- Replaceable brushes extend product life cycle
- 2 Pole construction to support high speed applications
- High efficiency to maximize battery life

ElectroCraft G680 Series

The 680 series offers high output in a highly efficient package for mid to low voltage, mid-level to high torque applications. This series combines the newest winding technology with premium materials to provide an efficient product significantly extending use cycles for remotely powered applications.

Typical Applications

- Electric Wheelchairs
- Single Person Electric Vehicles
- Pumps
- Blowers
- Medical Beds
- Tape Transporters
- Floor Care Equipment

G700 Series

Features and Benefits

- Dynamically balanced armatures insure smooth performance at any speed
- Rugged TENV Construction for reliability and long life
- Non-contact sealed ball bearings for improved efficiency and smooth operation
- Replaceable brushes extend product life cycle
- Low ripple tachometer options for speed regulation

ElectroCraft G700 Series

The 700 series offers high output for low to mid voltages, high torque applications. This series features robust four-pole construction and premium materials to provide a reliable solution.

Typical Applications

- Electric Wheelchairs
- Packaging Equipment
- Medical Beds
- Machine Tool
- Robotics

G720 Series

Features and Benefits

- *Dynamically balanced armatures insure smooth performance at any speed*
- *Rugged TENV Construction and optional sealed construction for reliability in most environments*
- *Non-contact sealed ball bearings for improved efficiency and smooth operation*
- *Replaceable brushes extend product life cycle*
- *Low ripple tachometer options for speed regulation*

ElectroCraft G720 Series

The 720 servo series offers smooth performance for high voltage, high torque applications. This series features premium construction and materials providing smooth and highly accurate performance across the operating speed range. If precision in motion is your goal this product is the choice.

Typical Applications

- CNC Machine Tools
- Packaging Equipment
- Robotics
- Light Industrial

ElectroCraft specializes in assisting you with an engineered solutions to meet your application needs. We also specialize in sourcing and assembling value added components to your assembly. Please contact your area sales representative (see world wide locations section) for assistance with your application needs.

Need a product fast?! ElectroCraft carries a limited supply of off-the-shelf model variations available for shipment within 48 hours. Please contact your area sales representative or our inside sales staff for a complete listing of stocked model numbers and pricing sheet.

R Series Motor Gearboxes

Features and Benefits

- *Choice of output ratios to meet a variety of different applications*
- *Quiet transfer of power to the drive wheels providing a comfortable operating environment*
- *Highly efficient to extend product range and capabilities*
- *Robust all metallic gears providing long durable life*
- *Compatible with ElectroCraft brush and brushless motors for your application requirements*
- *Available with industry standard connectors for ease of drive connection*
- *Manual or non-manual release brake options*
- *Custom configurations available - please contact your local sales representative*

ElectroCraft R Series Motor Gearboxes

The R series products are designed for low voltage high torque applications typically found in battery operated vehicle. Combine a precision two stage gearbox with one of ElectroCraft's G series or E series motors to transfer power smoothly and quietly to your drive wheels. The gearbox features all metallic gearing hobbled to a precision AGMA 9 class to provide durable performance while maintaining low noise level. With four ratios to choose from and numerous motor combinations R series can meet a broad range of performance needs.

Typical Application

- Power Wheelchairs
- Lift Trucks
- Unmanned Ground Vehicles
- Robots
- Rotational Axes Drives
- Personal Electric Vehicles
- Single Person Golf Carts

R Series Performance Specifications

Model	R702-A15	R685-A19	R685-A21	R683-A28
Ratio	15.46:1	19.03:1	21.00:1	28.62:1
Maximum No Load Speed ¹ (RPM)	3500	3500	3500	3500
Continuous Torque ² (LB-IN)	80	80	80	80
Continuous Speed (RPM)	210	160	145	120
Peak Torque (LB-IN)	400	440	495	550
Backlash (Degrees)	1	1	1	1
Maximum OHL (Over Hung Load)	250	250	250	250
Length (IN) - Dimensions (L)	11.15	11.65	11.65	10.50

T Series Transaxle Motors

Features and Benefits

- Choice of output ratios to meet a variety of different applications
- Quiet transfer of power to the drive wheels providing a comfortable operating environment
- Highly efficient to extend product range and capabilities
- Robust all metallic gears providing long durable life
- Compatible with ElectroCraft brush and brushless motors for all your application requirements
- Available with industry standard connectors for ease of drive connection
- Custom configurations available - please contact your local sales representative

ElectroCraft T Series

The T series products are the choice for your battery operated vehicle requiring a differential axle. Combine a precision two stage transaxle with one of ElectroCraft's G series or E series motors to transfer power to either of the drive wheels. The transaxle features all metallic gearing hobbled to a precision AGMA 9 class to provide durable performance while maintaining a low noise level. With three ratios to choose from and numerous motor combinations T series can meet your performance needs.

Typical Applications

- Power scooters
- Single person golf carts
- Unmanned ground vehicles
- Robots
- Personal electric vehicles

Nx Series Gear Motors

Features and Benefits

- Flange mounted
- All steel gears
- Ball bearings
- Precision die cast housing

ElectroCraft Nx Series

The Nx Series products are a general purpose solution for your application needs. Combined with ElectroCraft G series motors and offered in small, medium and large sizes. The small and medium versions feature five ratios offering a wide speed range to choose from. The large version offers three ratios with excellent torque performance.

Typical Applications

- Servo X-Y-Z Axes
- Robotics
- Semi Conductor
- General Purpose Applications
- Material Handling

AC Motor Series

ElectroCraft AC Motor Series

The AC product offers a wide choice of electrical types (see performance tables) with standard or customized mounting arrangements. ElectroCraft motors are engineered for versatility. Select from a wide range of head, shell and mounting configurations, as well as speeds and electrical types. These features, combined with our ability to produce output shafts with a variety of flats, keyways, splines, tapers, threads or cross holes, fit a variety of custom applications. ElectroCraft Engineered Solutions has a proven record of performance in applications requiring precise speed and torque control. Premium quality materials are used to offer top performance, quiet running and long life. The AC product meets or exceeds standards for materials, performance and safety established by Underwriters Laboratories and Canadian Standards Association.

AC Motor Types

Motor Types	HP Rating	Full Load Speeds (@ 60Hz)	Starting Torque	Breakdown Torque	Starting Current	Typical Characteristics
Permanent Split Capacitor (Type KP)	1/50 to 1/3	3250 1625	Low	Moderate	Low	Very compact, easy to maintain. High efficiency, high power factor. Can operate at several speeds with simple control devices. <i>Advantages:</i> Improved starting torque, quieter operation than split phase and provides frequent start/stop capability essential in many applications. <i>Disadvantage:</i> Performance is usually less satisfactory when starting. Changing the capacitor value will affect both starting and running conditions, so that any improvements in starting will usually result in a decrease in running performance.
Reluctance Synchronous Split Capacitor (Type SKP)	1/50 to 1/6	1800	Low	Moderate	Low	Same as Type KP, but used where constant speed is essential.
Capacitor Start (Type KL)	1/80 to 1/6	3450 1725	High	High	Moderate	Suitable for constant speed under varying load, high torques, high overload capacity. With the Type KP motor, a capacitor is added in "series" with the start winding during the start mode to increase starting torque and/or reduce starting current. The start winding and capacitor will be disconnected when the motor has reached approximately 70% of running speed. Since the "run" winding alone has no starting capability, both starting and running windings are energized while starting.
Reluctance Synchronous Capacitor Start (Type SKL)	1/30 to 1/3	3600 1800	High	High	Moderate	Same as Type KL, but used where constant speed is essential.
Polyphase (or 3-Phase) (Type L)	1/30 to 1/3	3420 1710	High	High	Moderate	Generally suited to same applications as capacitor start motors if polyphase power is available. Reaches operating speed smoothly and quickly. Very efficient design.

AC26 Motor Series

Features and Benefits

- Die cast aluminum rotor end rings and bars with integral cooling fans. Aluminum alloy selected to match performance to job requirements. Skewed rotor bars promote uniform torque, quiet running.
- Annealed laminations in stator and rotor keep efficiency high for cooler operation.
- Stator windings scientifically designed and computer matched to customer's requirements to assume maximum energy efficiency.
- Rotors are dynamically balanced to assure low vibration.
- Die cast aluminum end caps with precision machined fits assure uniform air gap, firm bearing support for quiet running, long life.
- Double-shielded or sealed ball bearings are greased for life with rust inhibiting grease; no periodic service needed.
- Durable Class B or Class F insulation system to meet UL and CSA standards.
- Thermal protector available to guard against accidental stalls or jams and prevent burnout.

Typical Applications

- Valve Actuators
- Blowers
- Pumps
- Office Equipment/Business Machines
- Medical Equipment
- Hoists
- Food Products Machinery

Options

Electrical: Class B insulation - UL and CSA Listed • Class F insulation - UL and CSA Listed • Choice of lead material, insulation thickness, gauge and length • Choice of lead combinations - tinned copper, spade, pin or lug terminals, plugs • Cord sets with or without plug ends or inline switches • Oil immersion insulation system • Relay and capacitor supplied (where necessary) • 50/60 Hz combined rating • Multiple voltage ratings.

Mechanical: Capacitor or relay cover shell mounted • Double shaft extensions • Special shaft configurations: Gear involutes, splines, external and internal threads, keyways, multiple flats, ring grooves, cross holes, screwdriver slots, multiple diameters, tapers • Totally enclosed configurations • Weld studs • Choice of shaft material.

AC29 Motor Series

Features and Benefits

- Die cast aluminum rotor end rings and bars with integral cooling fans. Aluminum alloy selected to match performance to job requirements. Skewed rotor bars promote uniform torque, quiet running.
- Annealed laminations in stator and rotor keep efficiency high for cooler operation.
- Stator windings scientifically designed and computer matched to customer's requirements to assume maximum energy efficiency.
- Rotors are dynamically balanced to assure low vibration.
- Die cast aluminum end caps with precision machined fits assure uniform air gap, firm bearing support for quiet running, long life.
- Double-shielded or sealed ball bearings are greased for life with rust inhibiting grease; no periodic service needed.
- Durable Class B or Class F insulation system to meet UL and CSA standards.
- Thermal protector available to guard against accidental stalls or jams and prevent burnout.

Typical Applications

- Valve Actuators
- Blowers
- Pumps
- Office Equipment/Business Machines
- Medical Equipment
- Hoists
- Food Products Machinery

Options

Electrical: Class B insulation - UL and CSA Listed • Class F insulation - UL and CSA Listed • Choice of lead material, insulation thickness, gauge and length • Choice of lead combinations - tinned copper, spade, pin or lug terminals, plugs • Cord sets with or without plug ends or inline switches • Oil immersion insulation system • Relay and capacitor supplied (where necessary) • 50/60 Hz combined rating • Multiple voltage ratings.

Mechanical: Capacitor or relay cover shell mounted • Double shaft extensions • Special shaft configurations: Gear involutes, splines, external and internal threads, keyways, multiple flats, ring grooves, cross holes, screwdriver slots, multiple diameters, tapers • Totally enclosed configurations • Weld studs • Choice of shaft material.

All torque values are in ounce-inches. KP=Permanent Split Capacitor; KL=Capacitor Start; L=Polyphase. Other motor types not shown here: SKP=Synchronous Permanent Split Capacitor; SKL=Synchronous Capacitor Start

These 3.42 inch diameter motors are designed for continuous duty in a 40°C ambient temperature. At nominal 1650 or 3450 rpm, ratings range from 1/60 to 1/4 HP (contact your area sales representative for intermittent ratings, higher ambient, or TENV construction). Motor specifications based on theoretical values for reference only.

AC33 Motor Series

Features and Benefits

- Die cast aluminum rotor end rings and bars with integral cooling fans. Aluminum alloy selected to match performance to job requirements. Skewed rotor bars promote uniform torque, quiet running.
- Annealed laminations in stator and rotor keep efficiency high for cooler operation.
- Stator windings scientifically designed and computer matched to customer's requirements to assume maximum energy efficiency.
- Rotors are dynamically balanced to assure low vibration.
- Die cast aluminum end caps with precision machined fits assure uniform air gap, firm bearing support for quiet running, long life.
- Double-shielded or sealed ball bearings are greased for life with rust inhibiting grease; no periodic service needed.
- Durable Class B or Class F insulation system to meet UL and CSA standards.
- Thermal protector available to guard against accidental stalls or jams and prevent burnout.

Typical Applications

- Valve Actuators
- Blowers
- Pumps
- Office Equipment/Business Machines
- Medical Equipment
- Hoists
- Food Products Machinery

Options

Electrical: Class B insulation - UL and CSA Listed • Class F insulation - UL and CSA Listed • Choice of lead material, insulation thickness, gauge and length • Choice of lead combinations - tinned copper, spade, pin or lug terminals, plugs • Cord sets with or without plug ends or inline switches • Oil immersion insulation system • Relay and capacitor supplied (where necessary) • 50/60 Hz combined rating • Multiple voltage ratings.

Mechanical: Capacitor or relay cover shell mounted • Double shaft extensions • Special shaft configurations: Gear involutes, splines, external and internal threads, keyways, multiple flats, ring grooves, cross holes, screwdriver slots, multiple diameters, tapers • Totally enclosed or totally enclosed fan cooled configurations • Weld studs • Choice of shaft material.

All torque values are in ounce-inches. KP=Permanent Split Capacitor; KL=Capacitor Start; L=Polyphase. Other motor types not shown here: SKP=Synchronous Permanent Split Capacitor; SKL=Synchronous Capacitor Start

These 3.86 inch diameter motors are designed for continuous duty in a 40°C ambient temperature. At nominal 1650 or 3450 rpm, ratings range from 1/50 to 1/3 HP (contact your area sales representative for intermittent ratings, higher ambient, or TENV construction). Motor specifications based on theoretical values for reference only.

ElectroCraft AC Series Model Number Designations

KL33 - 084A - OSBSWF

Motor Type

KL- Capacitor Start
KP- Permanent Split Capacitor
L- Polyphase
SKP- Synchronous Split Capacitor
SKL- Synchronous Capacitor Start

Frame Designator

26- 26 Frame (3.11 Diameter)
29- 29 Frame (3.42 Diameter)
33- 33 Frame (3.86 Diameter)

Performance Designator

26- 05-13 (see catalog)
29- 06-16 (see catalog)
33- 05-17 (see catalog)
Z- Custom – consult factory

Speed Designator

2- 2 Pole
4- 4 Pole
Z- Custom – consult factory for availability

Voltage Designator

A- 115V – 60 Hz
B- 220V – 50 Hz
C- 230V – 60 Hz
Z- Custom – consult factory

Enclosure Designator

O- Open Ventilated (see catalog for performance details)
V- TENV (consult factory for performance details)
F- Fan Cooled (33 Frame only)

Shaft Configuration

S- Standard (see catalog)
Z- Custom – consult factory

Front Head Designator

See catalog for details

26 Frame
S- Standard Flat Head – STD Tap
F- Four [4] Boss Mount on 2.625 B.C.
R- Resilient Hub
Z- Custom - consult factory

29 Frame
S- Standard Flat Head – STD Tap
F- Four [4] Stud Mount
Z- Custom - consult factory

33 Frame
S- Standard Flat Head – STD Tap
F- Four [4] Boss Mount on 2.844 B.C.
R- Resilient Hub
B- Four [4] Boss Mount on 1.75 B.C.
M- Four [4] Boss Mount on 2.625 thru 3.125 B.C.
P- Pump Mount
Z- Custom - consult factory

Rear Head Designator

See catalog for details

S- Standard Flat Head
R- Resilient Hub (26, 33 Frames only)
Z- Custom - consult factory

Foot Mount (omit if not required)

W- Rigid Base
T- Resilient Base (26, 33 Frames only)

Lead Designator

F- Flying leads
J- Junction box (33 Frame only)
Z- Custom – consult factory for terminals or connectors

AC Series Model Designations

Please indicate any special features not covered in the model number:

ElectroCraft specializes in assisting you with an engineered solutions to meet your application needs. We also specialize in sourcing and assembling value added components to your assembly. Please contact your area sales representative (see world wide locations section) for assistance with your application needs.

Need a product fast?! ElectroCraft carries a limited supply of off-the-shelf model variations available for shipment within 48 hours. Please contact your area sales representative or our inside sales staff for a complete listing of stocked model numbers and pricing sheet.

E2200 Series Brushless Motors

Features and Benefits

- *Dynamically balanced armature*
- *High torque-to-weight and inertia ratios*
- *Non-contact sealed ball bearings for improved efficiency and smooth operation*
- *Rare earth neodymium magnets for high acceleration and speed capability*
- *Speeds up to 15000 RPM*

ElectroCraft E2200 Series

The 2200 series offers reliable performance in a small package for your low voltage, lower torque range applications. This series utilizes integrated hall effects to provide consistent speed in either rotation in a small envelope. The 2200 series supports application speeds up to 15,000 RPM while providing long reliable performance.

Typical Applications

- Centrifuges
- Laboratory Equipment
- Copiers
- Printers
- Pumps

E2600 Series Brushless Motors

Features and Benefits

- Skewed magnetization for low torque ripple and smooth low speed performance
- M-8 ceramic magnets for high acceleration and speed capability
- Non-contact sealed ball bearings for improved efficiency and smooth operation
- Speeds up to 7500 RPM

ElectroCraft E2600 Series

The 2600 series offers reliable performance in a small package for your low voltage, lower torque range applications. This series features an economic design available in both closed and open shell configurations. The 2600 series supports application speeds up to 7,500 RPM while providing long reliable performance.

Typical Applications

- Material Handling
- Packaging
- Marking Equipment
- Copiers
- Printers
- Pumps

Kt Torque Constant +-10% (Ncm/amp)	11.4	22.9	11.4	22.9	10.7	20.8
Kt Torque Constant +-10% (oz-in/amp)	16.2	32.4	16.2	32.4	15.1	29.4
Ke Voltage Constant +-10% (V/Krpm)	12.0	24.0	12.0	24.0	11.2	21.7
Terminal Resistance (ohms)	0.94	3.63	0.33	1.18	0.18	0.63
Maximum Continuous Current (A)	3.3	1.6	6.5	3.2	10.6	5.4
Maximum Peak Current (A)	15.1	7.6	29.3	14.7	49.0	24.0
Armature Inductance (mH)	3.2	13.3	1.4	5.5	0.6	2.8

Hall Effect Electrical Data	
Hall type	Three channel
Output type	Open collector transistor
Output sink current	10mA at 0.4 Volt maximum
(On state) Output Voltage	4.9 Volt minimum
(On state) Power supply	5VDC at 20mA DC
Operating temperature	0° to 70°C
C.W. Rotation	Motor
Phase R	Blue
Phase S	Brown
Phase T	Violet
Hall Board +5V	Red
Hall Board Ground	Black
Hall Board Hall A	Yellow
Hall Board Hall B	White
Hall Board Hall C	Orange

ElectroCraft E Series Model Designations

E22 05A - ETH2

Series

E-Brushless Servo Motors

Frame Designator

22- 2.2 Frame (2.20" square)
26- 26 Frame (3.11" Diameter)
29- 29 Frame (3.42" Diameter)
33- 330 Frame (3.86 Diameter)

Length Designator

05-30 based on available
motor lengths (see catalog)

Winding Designator

A- see catalog for specific values
B- see catalog for specific values
Z- Custom

Mounting Designator

E-English
M-Metric
N-NEMA
Z-custom-consult factory

Lead Designator

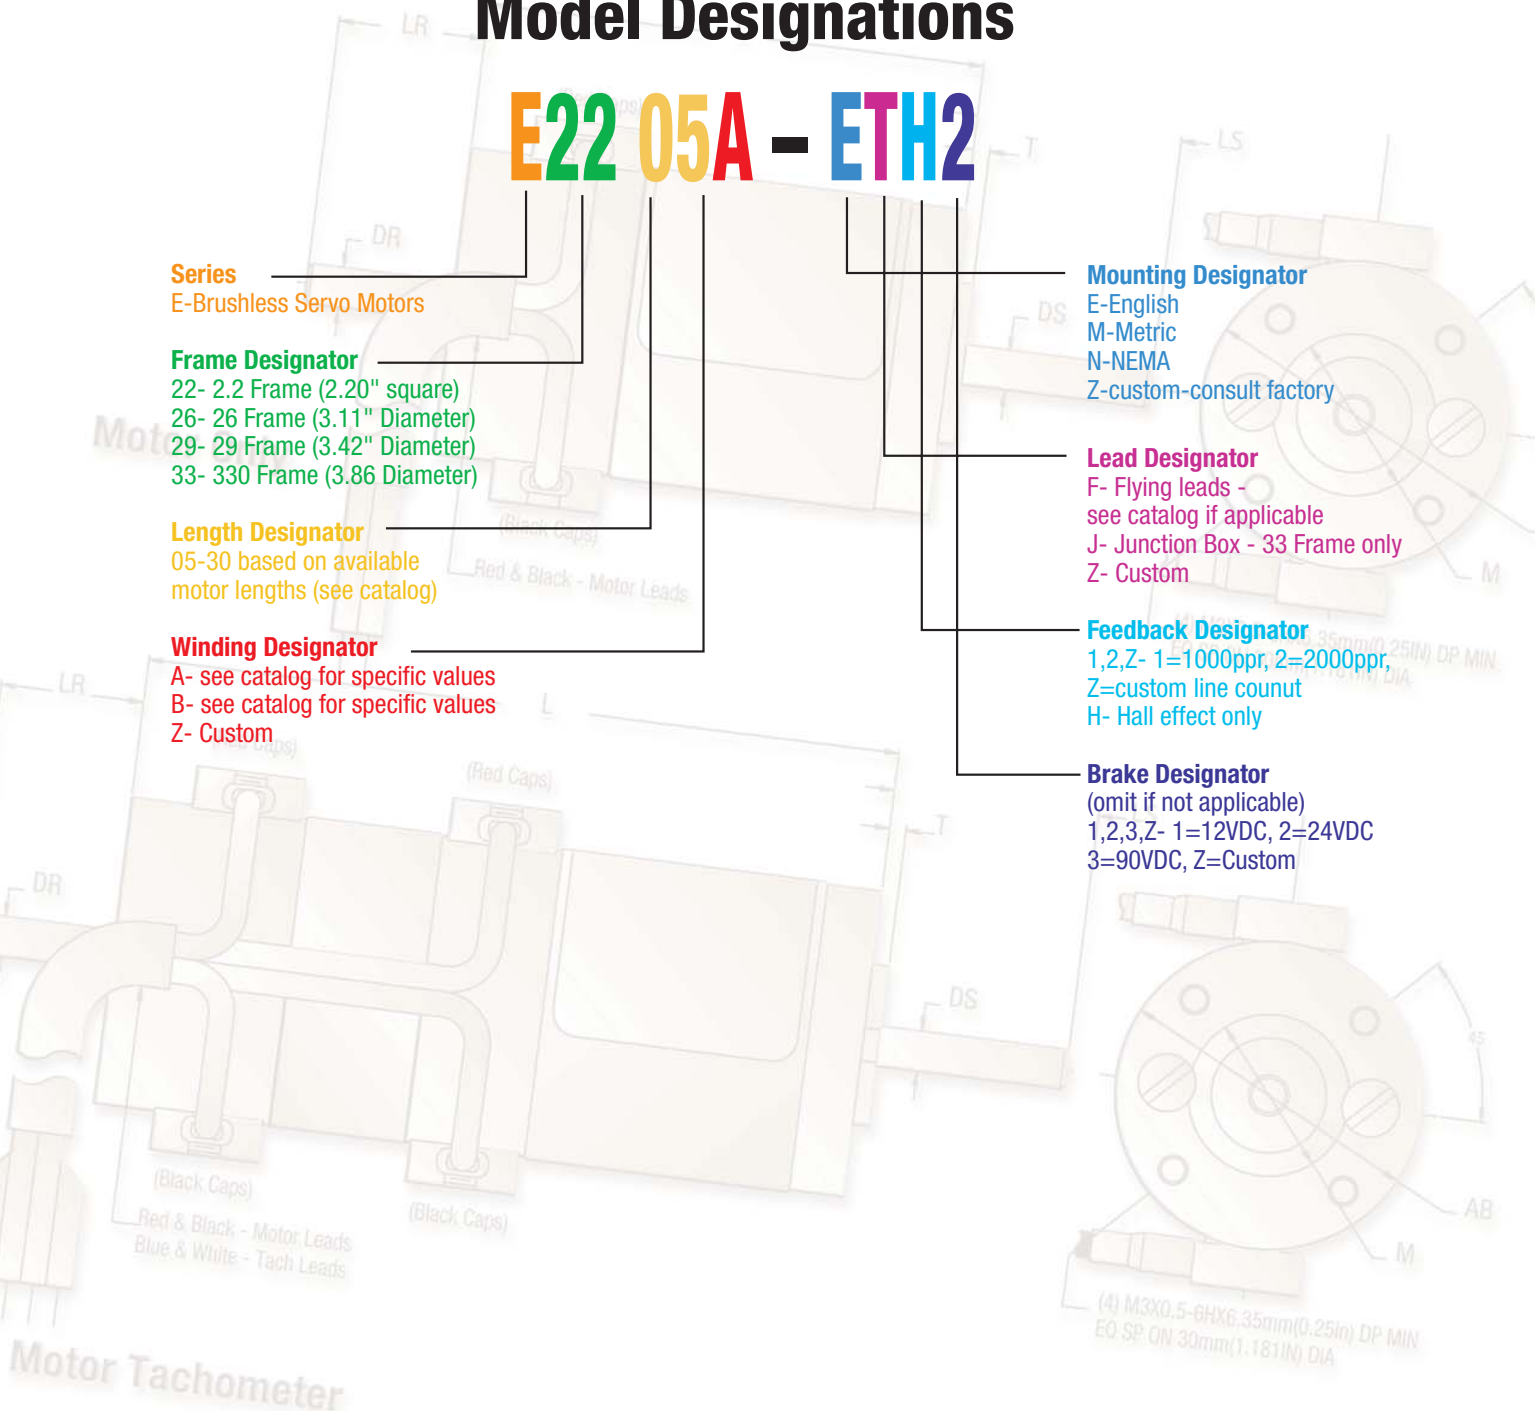

F- Flying leads -
see catalog if applicable
J- Junction Box - 33 Frame only
Z- Custom

Feedback Designator

1,2,Z- 1=1000ppr, 2=2000ppr,
Z=custom line count
H- Hall effect only

Brake Designator

(omit if not applicable)
1,2,3,Z- 1=12VDC, 2=24VDC
3=90VDC, Z=Custom

Please explain any custom (Z) designators:

Please indicate any special features not covered in the model number:

ElectroCraft specializes in assisting you with an engineered solutions to meet your application needs. We also specialize in sourcing and assembling value added components to your assembly. Please contact your area sales representative (see world wide locations section) for assistance with your application needs.

Need a product fast?! ElectroCraft carries a limited supply of off-the-shelf model variations available for shipment within 48 hours. Please contact your area sales representative or our inside sales staff for a complete listing of stocked model numbers and pricing sheet.

NOTES

Motor Only

ElectroCraft Engineered Solutions is dedicated to supplying customized solutions for OEM power transmission requirements. By combining the innovative thinking of skilled personnel with quality manufacturing processes and specialized equipment, we are able to offer premium AC, DC servo, and brushless DC motors, which have become world recognized for their quiet operation, high efficiency and robust designs. We offer complete packages to OEMs to allow the ease of purchasing all their power transmission solutions from a single source. ElectroCraft Engineered Solutions is dedicated to supplying the OEM with optimized automation solutions. Quiet operation, high efficiency, and robust designs have earned us a reputation for leadership in the industry. We offer a complete package of motor, gearhead, transaxle, and brake in a variety of design options and gear ratios. For additional information on this product or any other ElectroCraft products, please contact your nearest ElectroCraft sales office.

A Rockwell Automation Business

For more information you can reach us at www.electrocrafft.com ElectroCraft Engineered Solutions, a Rockwell Automation business, is a leading supplier of customized, premium AC, DC, brushless DC motors, and power transmission solutions to OEMs throughout the world.
