Search **multiple sources** (dictionaries, corpora, machine translation engines, search engines) with a single click with this **multilingual metasearch engine**. Select a **language pair** and submit a **search**. **MagicSearch** will display a **single scrollable page** with **multiple sources**. You can **click on each source button** as it changes its colour (=loads) to **move to the respective source**. MagicSearch **remembers the language pair** you selected the next time you visit the site (using a cookie).

You can **customize the order of the dictionaries**, as well as **add/remove dictionaries** (just click on the **gear icon** to display the settings).
