UVa

By publishing its monograph “The UVa in Figures”, the University of Valladolid has, for another year, renewed its commitment to transparency with the university community and society. Said publication provides a summary of data and indicators which might help all members of the university community when planning the activities our university will be engaging in, a university which belongs to everybody.

This report forms an important part of the University of Valladolid Quality Assurance System and as such aims to fulfil its mission of analysing and reflecting on the supply and demand of academic courses, how successful academic results have been, and how of all of these factors have evolved over time.

Hidden behind what may at first glance seem like cold and impersonal figures and data lies the effort, dedication and daily work of all the members of the university community who strive to forge a University of Valladolid which is increasingly adapting to the demands of society and which is ever more devoted to fulfilling its commitments.

Firm in the belief that this organised summary of evidence may once again afford readers the opportunity to gain deeper insights into the University of Valladolid, we would like to thank those who have made this new edition possible for their dedication and commitment to everybody.

Daniel Miguel San José
CHANCELLOR
